

JEREMIAH BROZ

Energy Advantage Roofing and Solar, Owner

Being an Entrepreneur has changed my life! As I grew up, I was always told that someday I would go to college, get a job, work my way up the corporate ladder and eventually, when I'm 50, I could be a manager. This was what my parents wanted of me because it is what they did and what my whole family did. Unfortunately, I struggled to conform to their notion of "Making it," as I couldn't think of anything more boring or monotonous than that. I had a dream of being bigger, bolder, and brighter, and living a life that I felt best suited me!

My current business is my 5th startup and most successful to date. I've recruited, hired and trained over 550 sales people in my career and many of them have gone off to start businesses of their own. I continue to mentor them to this day. I've also been through bankruptcy, divorce, and loss of property, but instead of quitting, I picked myself up, brushed myself off and went on to fight for what I wanted out of life! Without these failures I wouldn't know how to rebound when the times got tough. Without the successes in my life I wouldn't know how much my talents can truly impact the world around me. As a mentor, I have a wealth of knowledge in business finance. I can help you understand how cash should flow in your business, how to bill customers, what to charge for your product/service, and simply how money works. I also have a lot to share in the area of employee management, should you be ready to

hire some employees. I'm excited to help you as you take this step on your entrepreneurial journey!
